

Chiropractic Training Program for Health Professionals

(Product Code KK-CL01)

Over many years, Kiro Kids have developed a community service based product for promoting their clinics in the communities where they operate practices. This chiropractic training program for health professionals is a short course which teaches health professionals such as child health nurses, midwives, podiatrists and others the fundamental basics of the chiropractic paradigm of health care and a simple step by step system for screening their patients for subluxation. A brilliantly successful system which has proven itself over and over again in the Kiro Kids clinics. The training course is professionally presented on CD with a detailed instructors manual that leads the chiropractor step by step through every detail of the course. This proven product will serve to create a rich source of paediatric patients for your practice year after year.

Compendium of Paediatric Normals for the Chiropractor

(Product Code KK-CL02)

This booklet is a compilation of many useful normal values related to the care of children which will serve as a ready reference for use in your consultation room. This product will save you so much time as you use it in clinic to determine quickly and with certainty the normality or otherwise of measurements and clinical findings in your little patients. A compendium is to be found in every consultation room in the Kiro Kids clinics.

Compiled by: Dr Neil J Davies
